J/HZ sintered steel rings: for particularly demanding quality requirements

For special worsted yarn applications and twisting:

J and HZ sintered steel rings are unbeatable for extremely sensitive yarns and where extremely high quality in terms of evenness and cleanness is required.

Sintered rings allow very high speeds with extremely low bobbin contamination. They show their advantages particularly in draw twisting with hard-chrome steel travellers at extremely high drawing-off speeds. A further area of application is the twisting of special yarns with nylon travellers on large-diameter rings.

360° R+F Performance

Performance line J/HZ
sintered steel ring
vs. comparable products

Variants of the rings are:
Hight J rings: 9.1, 11.1 and 17.4mm
Hight HZ rings: 6.3 to 38.1mm
