thanks to special  
coating

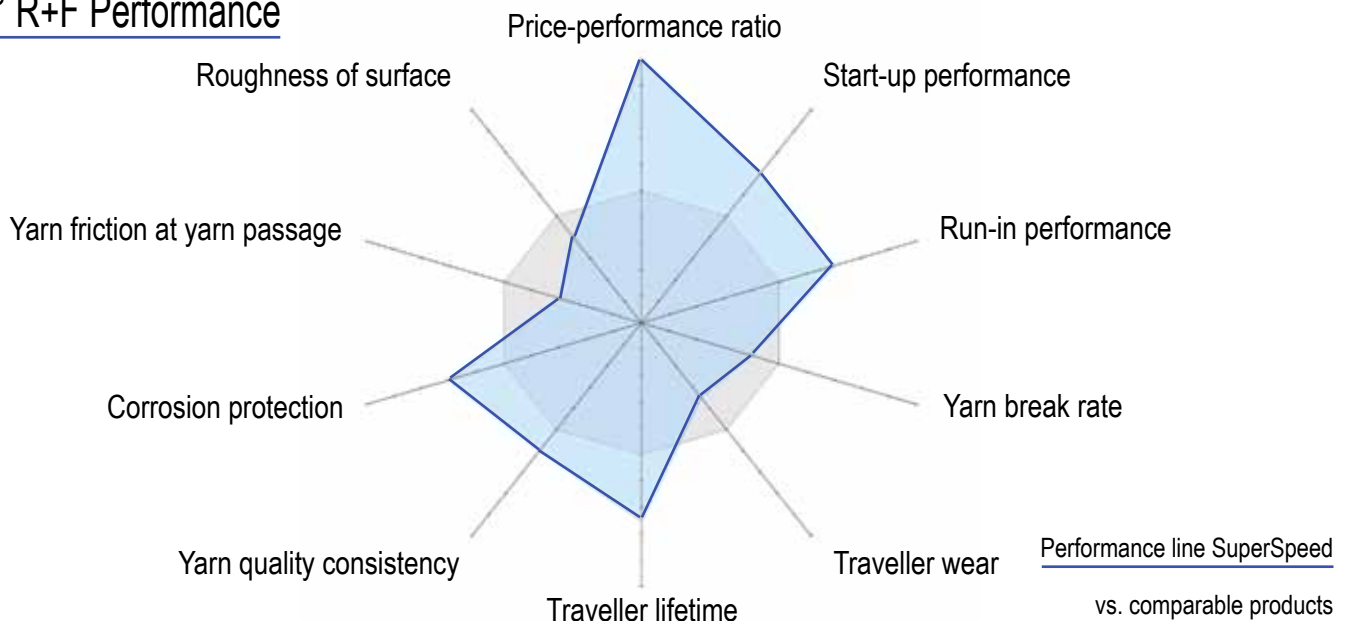

# SuperSpeed: all-round quality thanks to special coating

The all-rounder in the R+F team:

SuperSpeed quality, „Made in Germany“. Ultra-high speeds combined with a super finish make the SuperSpeed traveller from R+F a real winner.

The high-quality standard coating is designed for use in all applications. The wear-resistant nickel coating with its good gliding properties enables a gentle yarn passage. Consistently high yarn quality, high productivity and long traveller service lives offer the best-possible all-round characteristics.

## 360° R+F Performance

Variants of travellers: Clip (magazined) or loose execution. Quantity depending on the ISO weight of the travellers.

Contact your R+F representative for further information and technical specifications or any R+F innovations.
